PLUG INTO A POWERFUL NETWORK

With assets worth \$182 billion, electric cooperatives add consumers faster than investor-owned utilities.

And across the nation, co-ops are deploying advanced communication and automation technologies to transform the grid. Co-ops are leading the charge to build a smarter, more reliable grid.

WHAT ARE CO-OPS BUYING?

Owning and maintaining 42% of all distribution lines (2.6 million miles) in the US and serving 42 million consumers in 88% of the nation's counties, distribution co-ops will spend \$6.5 billion upgrading and maintaining system assets.
